

SOLID WASTE MANAGEMENT PLAN
SHORT TERM WORK PROGRAM UPDATE
DAWSON COUNTY / CITY OF DAWSONVILLE

November 24, 2003

INTRODUCTION

In 1993, Dawson County prepared a Comprehensive Solid Waste Management Plan for the County and the City of Dawsonville as required by the Georgia Comprehensive Solid Waste Management Act of 1990. The Act requires updates to the comprehensive plan every ten years and an updated short-term work plan every five years. A short-term work plan was prepared by the County in 1998. Due to a scheduling change by the Georgia Department of Community Affairs, the required update to the comprehensive plan has been delayed until 2006. This short-term work plan has been prepared as an interim work plan to document solid waste management accomplishments in the past five years and to outline planned management activities and procedures for the next three years.

STATUS/REPORT OF ACCOMPLISHMENTS

Solid Waste Management activities and procedures set forth in the 1998 short-term work program update are listed below followed by a discussion of the status of the item.

Waste Reduction

✓ From 1992 to 1998, waste reduction efforts in the County included construction of a recycling station at the Dawson County Landfill on Shoal Hole Road. The facility accepted aluminum, glass, and steel materials. The 1998 short-term work program indicated that the County planned to incorporate improved recyclable material collection facilities into the proposed solid waste transfer station and expand the recycling program to include paper, plastic, and cardboard materials. An improved recycling center was constructed at the County's transfer station in 2002. The recycling center currently accepts Aluminum, Newsprint, Plastics, cardboard, magazines, and scrap metal.

The City of Dawsonville expected to implement a recycling program in 2003. However, due to a lack of funding, the program was not implemented.

Collection

Collection services were not provided by the County or City in 1992. Residents transported waste to the County-owned disposal facility until its closure in 1999 or contracted directly with private collection companies. According to the 1998 short-term work program update, the County planned to construct a solid waste transfer station in 1999 to provide for collection while the City planned to provide additional dumpsters. Continued service by private collection companies, contracting directly with residents, was assumed.

The County constructed a transfer station adjacent to the Dawson County Landfill and opened the facility on May 19, 2003. A temporary transfer station was used during the

period between closure of the landfill in 1999 and opening of the permanent transfer station in 2003. The number of dumpsters available to City residents was increased from one to three.

Disposal

In 1992, the County had planned to expand the Dawson County Landfill to provide additional disposal capacity for City and County residents. According to the 1998 update, this plan was abandoned and replaced by a plan to contract with an out-of-County, commercial disposal facility.

The landfill ceased receiving waste in 1999. The County then constructed a temporary transfer station and contracted with a private hauler who transported waste to Pine Bluff MSWL in Cherokee County, Georgia. Once the permanent transfer station was completed, the County contracted with Eagle Point landfill in Forsyth County, Georgia to provide Disposal capacity. The City of Dawsonville contracted with Evans Garbage Service to transport waste generated in the City to the Mauldin Transfer Station in Forsyth County for disposal.

Education

No education activities were planned by the County in either the 1992 comprehensive Plan or the 1998 short-term work program update. The City planned to assist schools with recycling awareness programs. Keep Dawson Beautiful (KDB), an education organization, has been active in the County and City since January of 2003. KDB provides speakers to local schools and civic organizations as well as providing literature on solid waste issues. KDB is funded through donations and grants.

PLAN FOR 2003 THROUGH 2006

The County and City plan to provide continued solid waste management through 2006 with the strategies discussed below. These strategies constitute the Short-term Work Program for the period 2003 to 2006 and summarized in the attached table.

Waste Reduction

The County plans to construct an improved recycling/convenience center at the transfer station. The center is planned to open by June 2004 and will accept the same materials currently collected from County and City residents. The proposed recycling center is part of a regional recycling effort involving Dawson, Lumpkin, Union, Towns, and Banks Counties. The regional effort is intended to pool resources to improve markets for recycled materials and increase citizen awareness through additional educational measures.

The new recycling center is planned for construction in early 2004 and costs are estimated at \$50,000.00 for startup and \$3,000.00 per year for operation. These costs are to be funded through the Scrap Tire Fee, Recyclable fee, GEFA grants and the general fund.

Collection

The County intends to continue operating the transfer station to provide waste collection. Additionally, City residents will begin using the transfer station by the end of 2004. It is assumed that private collection companies will also continue to operate in the County. The County will maintain contracts with private haulers to transport waste from the transfer station to the disposal facility.

Operation of the transfer station costs approximately \$310,000.00 per year (including disposal costs) and is funded primarily by tipping fees at the transfer station and a host fee from the disposal facility.

Disposal

Note * Waste from the transfer station will continue to be transported to Eagle Point Landfill in Forsyth County for disposal. A capacity assurance letter for the disposal facility is attached. It is noted that the City of Dawsonville intends to remove the current convenience center and begin disposal through the County's transfer station by the end of 2004. Disposal costs for the County are included in the transfer station discussion above. The City currently expends approximately \$1,400.00 per month on disposal. Once the City begins using the County facility, these monies will be paid to the County. *

Education

No additional education programs are planned for the next three years. The County and City will continue to support the Keep Dawson Beautiful organization and their educational programs.

REVISION SCHEDULE

An updated Comprehensive Solid Waste Management Plan will be prepared in 2006. A public hearing will be scheduled by March 1, 2006 to announce the planned update and seek citizen input. The plan will be updated before July 1, 2006 with a second public hearing scheduled approximately 30 days after completion of the plan. The updated plan will be adopted by the governing bodies and submitted to the Georgia Mountain Regional Development Center by October 31, 2006.

**DAWSON COUNTY / CITY OF DAWSONVILLE
 MULTI-JURISDICTIONAL SOLID WASTE MANAGEMENT PLAN
 INTERIM SHORT-TERM WORK PROGRAM
 2003 – 2006**

ELEMENT	PLANNED ACTIVITIES	PLANNED DATES	ESTIMATED COSTS	FUNDING MECHANISMS
WASTE REDUCTION	County – Construct new convenience center. Implement multi-jurisdictional recycling program.	2004	\$50,000 Start-up \$3,000 annually	Scrap Tire Fee, Recyclable Fee, GEFA Grants, General Fund
	City – Use County facility	2004	N/A	N/A
COLLECTION	County – Continue Transfer Station operation	2003-2006	\$310,000 annually	Tipping Fees, Host fee
	City – Use County facility	2003-2006	\$17,000 annually	General Fund
DISPOSAL	County – Continue Transfer Station operation	2003-2006	Included in Collection Costs	Tipping Fees, Host fee
	City – Use County facility	2003-2006	Included in Collection Costs	General Fund
EDUCATION	County – Support KDB	2003-2006	N/A	N/A
	City – Support KDB	2003-2006	N/A	N/A

15. Describe the areas to be serviced under this grant. Include the following information:

- a) names of counties, municipalities, towns, etc;

This project services Dawson County and the City of Dawsonville.

- b) current population estimates;

Dawson County – 15,999
City of Dawsonville – 830

- c) area descriptions including which areas are rural, urban and suburban;

Dawson County is a rapidly growing county (94th in the nation) 90 miles north of Atlanta and is located in the northeast part of the State. Its boundaries adjoin Lumpkin, Gilmer, Fannin, Pickens, Cherokee, Forsyth and Hall Counties. Dawson is a mountainous rural county comprised of farmland, trout streams, single-family residential subdivisions and developed retail corridors on Ga. Hwy. 400. The southeastern boundaries of the county is bounded by Lake Lanier. The county includes The City of Dawsonville and a large portion of acreage devoted to the Dawson Forest Wildlife Management Area.

- d) Approximate square mileage of service area.

The approximate service area of Dawson County is 211 square miles.

16. For multi-jurisdictional projects, identify the lead local government and list each local government and the role each will have in the project.

The lead local government in the NGRMA regional system and the location of the regional facility is Lumpkin County. The City of Dahlonega and other member counties included in the NGRMA regional system and their respective roles are:

Dawson County – marketing and/or collection, processing, and vending materials through NGRMA Regional Recycling Cooperative;

City of Dawsonville – marketing and/or collection, processing, and vending materials through NGRMA Regional Recycling Cooperative;

Union County – marketing and/or collection, processing, and vending materials through NGRMA Regional Recycling Cooperative;

Banks County – marketing and/or collection, processing, and vending materials through NGRMA Regional Recycling Cooperative;

Towns County – marketing and/or collection, processing, and vending materials through NGRMA Regional Recycling Cooperative.

17. Describe your current solid waste management system including your recycling and/or waste reduction program(s) and yard trimmings management program (if applicable). Include collection methods, materials collected, processing methods, marketing approaches and educational efforts. (Attach additional descriptions if necessary).

Dawson County currently transfers solid waste to a privatized landfill (Eagle Point, in Forsyth and Dawson Counties). The county presently recycles mixed-paper, OCC, PETE, HDPE, aluminum, and glass. The county presently employs a full-time environmental educator. Dawsonville accepts solid waste at a site located in the City of Dawsonville.

18. Has your community done a recycling plan? If so, please attach. If not, what needs do you anticipate the program will have in the next 2 to 3 years.

Dawson County addresses recycling in its Solid Waste Plan. With participation in the NGRMA Regional Recycling Cooperative, Dawson County looks forward to promoting the comprehensive recycling plan. The primary future anticipated need will be recycling infrastructure (bins) to support expansion of county collection efforts and efficiency.

19. Describe your community's policy(ies) and procedures for the purchase of products and materials made from recycled materials. Attach a copy of your community's "buy recycled" ordinance or procurement policy.

Whenever possible, recycled content materials are purchased providing they are not more than 10% above the cost of non-recycled materials.

20. Explain how previous GEFA and other grant funding has been used to establish or implement your existing programs (if applicable). N/A

21. Describe the project for which grant funding is being requested, including how grant funds will be used to achieve or make progress toward local or state solid waste management/waste reduction goals. Please include cost estimates for materials, facilities, equipment, education, administrative, contractor and other direct costs. Cost estimates must match budget pages. Attach additional pages if necessary. Please highlight the following:

The project is a regional recycling cooperative comprised of Lumpkin, Dawson, Union, Towns, and Banks Counties. This cooperative, administrated through North Georgia Resource Management Authority (NGRMA), will collect, process, vend, or market materials in member or participating counties. The NGRMA program will employ the use of V-Quip, Inc. recycled materials collection system and will incorporate (but not be limited to) the collection of Aluminum, plastics (PETE and HDPE), mixed-paper, cardboard (OCC), metal (tin) cans, scrap metal, white goods, and oil and antifreeze (facility location only). The requested grant funding would be utilized to purchase two (2) material collection bin drop-off sites, numbering seven (7) bins each, to be placed at commercial locations within an incorporated area of Dawson County. These drop-off depots are the first in a planned series of county and city sites to support participation in the NGRMA Regional Recycling Cooperative and will be commensurate with equipment utilized by said organization. The estimated cost of the initial drop-off depot sites is \$100,000 of which Dawson County and the City of Dawsonville will provide \$5,000 each cash match through county and city general fund revenues.

- a) If the project involves the use of scrap tire materials, describe the estimated quantity of scrap tire material to be used and the material that would have been used if scrap tires were not used. N/A
- b) If the project is a demonstration project, describe the objective of the demonstration, including how this project will be used to remove impediments to the use of a specific product or material or will validate the feasibility of the use. Identify the methods to be used to document project results and communicate results to other potential customers, and identify partners, such as end use markets or academic groups, participating in the project.

The NGRMA Regional Recycling Cooperative has been established to remove localized impediments to successful, cost-effective recycling programs. Individual county recycling programs that often lack marketable material tonnages, cannot financially support aggressive education or outreach programs, and lack sufficient, targeted recycling infrastructure are bolstered by this regional support. The goal of NGRMA's regional approach is to affect a long-term, regionalized change in the recycling methods and mentality of North Georgia counties. With this approach, citizens within every member county will recycle the same materials, using the same collection system, seeing the same logo, reading the same educational or outreach materials, and understanding the same methods, rules, and

regulations. This conceptual continuity coupled with significant strides in infrastructure development will stimulate appreciable citizen participation, increase commercial and industrial participation, and ensure the necessary quality of materials collected. Moreover, from a regional solid waste perspective, participating governments (county and municipal) will realize significant advantages through recycling program affiliation that are no less salient and applicable to solid waste collection, transfer, and disposal systems. Therefore, the NGRMA Regional Cooperative would provide a foundation (and feasibility) for examining future affiliation in solid waste planning, collection, and disposal systems. For example, by marketing their solid waste tonnages collectively, NGRMA member counties and municipalities would realize savings through reductions in tipping fees.

NGRMA will record material specific tonnages, keeping careful records of materials collected, revenues realized, and member county per capita fee encumbrances. NGRMA will produce operational reports, keeping member counties informed as to the progress of authority objectives and the quantity of materials collected throughout the regional system's operational jurisdiction. NGRMA will also produce a yearly popular report including statistics concerning system operations, new regional developments, and upcoming events and will disseminate said report throughout the regional system's service area. This information would serve to provide Dawson County and the City of Dawsonville citizens with a progress report concerning regional and local recycling efforts as well as an announcement board for popular events, grant news, or other significant events relation to regional recycling efforts.

- c) For equipment purchases/capital costs, program elements that must be addressed shall include: how the purchase of the equipment relates to the ongoing program or the establishment of a new program; a description of how the equipment will be used; a complete description of plans to construct or retrofit; and a discussion of proposed recycled content products usage plan.

The NGRMA Regional Recycling Cooperative entails the installation of drop-off sites throughout the system service parameters. These parameters presently include 1,233.7 square miles of service area, constituting five (5) county jurisdictions including Dawson County. Requested grant funding would be applied to the acquisition of Dawson County and the City of Dawsonville's initial drop-off depot sites. Each site will include seven (7) material collection bins (6 yard) designed to accept either one commodity or two and having commodity specific openings in order to limit contamination. Later additions to these sites are an anticipated eventuality, given the future increase in participation and success that the NGRMA system's outreach, education, and equipment will entail. Equipment description and details are included as an appendix to this grant application.

- d) If the project is a waste reduction program, describe target audience, method of outreach (e.g., workshops, peer matching, or networks), quantity/volume of targeted solid waste currently being disposed in a MSW landfill, and method to evaluate or track waste reduction efforts.

The target audience of the NGRMA Regional Recycling Cooperative will be the citizens, tourist / visitors, and commercial and industrial businesses in Lumpkin, Dawson, Towns, Union, and Banks Counties. NGRMA will incorporate various methods of education and outreach in order to create regional and localized stakeholders as well as informed patrons. NGRMA will engage commercial and industrial businesses on a regional and local level both to inform them of general recycling opportunities and to encourage their association with the Authority. This contact will be accomplished through personal outreach via Dawson County's Environmental Educator and the Executive Director of NGRMA, NGRMA's Environmental Education Specialist, and regional, informal workshop meetings designed to create stakeholders employing direct affiliation. Dawson County's Environmental Educator will continue educational efforts in all the schools and work with the Authority's Environmental Education Specialist, who regularly conducts both special events and routine continuing programs throughout NGRMA member county school systems. NGRMA will also undertake an extensive informational drive in member counties, including tri-folding leaflets

and informative brochures, intended to familiarize member county citizens with the regional collection system, the system's accepted materials, and generally appropriate methods of recycling (including cautionary assessments of material contamination). Special events, festivals, and fairs will be opportunities for NGRMA to reach a wider audience. The Authority will participate in these events through targeted collection, via a special-event recycling trailer, and general information/outreach booths and presentations. Each member county will "book" collection assistance for fairs and festivals and can expect NGRMA representation to accompany such efforts.

Specifically, the estimated volume of solid waste materials disposed of yearly in Dawson County is 14,399 tons.

NGRMA will record material specific tonnages, keeping careful records of materials collected, revenues realized, and member county per capita fee encumbrances. NGRMA will produce operational reports, keeping member counties informed as to the progress of authority objectives and the quantity of materials collected throughout the regional system's operational jurisdiction. NGRMA will also produce a yearly popular report including statistics concerning system operations, new regional developments, and upcoming events and will disseminate said report throughout the regional system's service area. This information will serve to provide Dawson County citizens with a progress report concerning regional and local recycling efforts as well as an announcement board for popular events, grant news, or other significant events related to regional or local recycling efforts.

22. Provide contact information for the Department that will implement the project. Please include the name and contact information for the Project Manager. If your community is partnering with a consultant or nonprofit, please include their contact information here and their responsibilities on the project.

Randy Bowen, Public Works Director will implement the project and partner with Keep Dawson County Beautiful to educate the public on our recycling program.

23. All applicants for Recycling/Waste Reduction Grants (RWR) are required to contribute a cash amount equal to 10% of the funds requested. (For example, a grant request for \$100,000 would require proof of a cash match of \$10,000. A similar grant request for \$10,000 would require a match of \$1,000). In the case of multi-jurisdictional RWR grants, all participating applicants must explicitly provide part of the cash match and the amount matched by each must be shown on the required one page budget. State the amount of the cash match, identify the source of the match and highlight this in project budget.

Dawson County and the City of Dawsonville are requesting \$100,000 in GEFA grant awards funding and will provide a \$5,000 cash match each to be derived from the county and city general fund revenues.

24. Provide a timetable for the development and implementation of the project for the term of the grant (one-year). Attach separate sheet with Timetable to application. (See Attached)

25. Has applicant entered into any written contract, written bid or written agreement to develop and/or implement a solid waste reduction program and/or recycling program? (include private waste management companies, processors, haulers, and end users). If so, please provide pertinent information or attach a copy of the document or summarize contract information.

Yes, Dawson County's Letter of Intent to participate in the North Georgia Resource Management Authority Regional Recycling Cooperative is included as an attachment in the appendix of this grant application.

26. List the anticipated and available markets (names of vendors) or uses for materials collected through the local government recycling programs. List any existing public or private recycling programs in the project area and discuss how these programs will be affected by the proposed project.

ATTACHMENTS

LETTER OF INTENT

After an extensive series of meetings, including representatives from other interested governing intities, The City of Dawsonville hereby agrees to participate in a regional recycling program and system. This regional system will serve North Georgia Resource Management Authority member counties and include the collection, processing, marketing, and vending of recyclable materials. Contingent upon the advantage of The City of Dawsonville, all materials generally accepted by this regional cooperative effort, including but not limited to, mixed paper, cardboard (OCC), plastics (#1 PETE, #2 HDPE), aluminum, and light metals – will be either marketed or collected, processed, and vended through this regional recycling system. This system will be administrated through North Georgia Resource Management Authority (NGRMA), of which the City of Dawsonville will be a voting member, and may include the cooperation and participation of other interested North Georgia mountain communities.

The City of Dawsonville may apply future state or federal resource management or recycling grant awards to the acquisition of equipment necessary for the collection, processing, or vending of materials commensurate with equipment or infrastructure utilized by NGRMA for said purposes.

We feel confident that the operations of this regional system will serve the recycling needs of Dawson County Citizens and we are in full support of this initiative in solid waste reduction.

Mayor of Dawsonville

DAWSON COUNTY BOARD OF COMMISSIONERS

LETTER OF INTENT

After an extensive series of meetings, including representatives from other interested counties, Dawson County hereby agrees to participate in a regional recycling program and system. This regional system will serve North Georgia Resource Management Authority member counties and include the collection, processing, marketing, and vending of recyclable materials. Contingent upon the advantage of Dawson County, all materials generally accepted by this regional cooperative effort, including but not limited to, mixed paper, cardboard (OCC), plastics (#1 PETE, #2 HDPE), aluminum, and light metals – will be either marketed or collected, processed, and vended through this regional recycling system. This system will be administrated through North Georgia Resource Management Authority (NGRMA), of which Dawson County will be a voting member, and may include the cooperation and participation of other interested North Georgia mountain communities.

Dawson County may apply future state or federal resource management or recycling grant awards to the acquisition of equipment necessary for the collection, processing, or vending of materials commensurate with equipment or infrastructure utilized by NGRMA for said purposes.

Dawson County will designate county citizens to serve on the Dawson County Solid Waste Information/Environmental Committee (SWIC). This committee will gain extensive information concerning solid waste and recycling issues in Dawson County and work in an advisory capacity to the Dawson County Commission. Dawson County will designate two (2) members of the county SWIC to serve as members of the North Georgia Regional Solid Waste Information Committee. This regional SWIC will gain extensive information concerning regional solid waste and recycling issues and will act in an advisory capacity to NGRMA concerning the regional recycling program and its operational, administrative, or educational components.

The Chairperson of this regional committee will be chosen during the initial regional committee meeting and the concerns, opinions, and recommendations of said regional committee will be of vital importance to the successful operations of the regional recycling initiative.

We feel confident that the operations of this regional system will serve the recycling needs of Dawson County Citizens and we are in full support of this initiative in solid waste reduction.

Mike Beatty
COMMISSIONER

Sonny Perdue
GOVERNOR

January 13, 2003

Ben J. Hulsey
Executive Director, Georgia Mountains RDC
Post Office Box 1720
Gainesville, Georgia 30503

Dear Ben:

Our staff has reviewed the Solid Waste Short-Term Work Program (STWP) update for Dawson County and the City of Dawsonville. We find the update to be in compliance with the Minimum Planning Standards and Procedures for Solid Waste Management.

To regain eligibility for solid waste permits, grants, and loans Dawson County and the city of Dawsonville must adopt the STWP update and forward a copy of the adoption resolution to our office.

As soon as we receive notification that the County and City have adopted the STWP update, we will send official notification of their eligibility to receive solid waste permits, grants, and loans.

Sincerely,

Rick Brooks, Director
Planning and Environmental Management Division

Dawson County
25 Tucker Avenue, Ste. 102
Dawsonville, Georgia 30534

Dear Mr. Johnsa:

This letter serves as a disposal capacity assurance for waste generated by Dawson County from 2004 to 2014. The Georgia EPD permit number for this facility is 058-012D (MSWL). This assurance is based upon Dawson County disposing of approximately 2,910 tons of waste at this facility on an annual basis.

We thank Dawson County for this business partnership and look forward to providing environmentally sound waste disposal options for the foreseeable future.

Sincerely,

Gerald Allen
District Manager-Atlanta Landfill's and Transfer Stations

DAWSON COUNTY BOARD OF COMMISSIONERS

December 5, 2003

Georgia Mountain Regional Development Center

To whom it may concern:

This letter is to certify that the Dawson County Board of Commissioners, at their regular December 4, 2003 Commission meeting, did unanimously approve the submission of the attached Solid Waste Management Short Term Work Program Update to the Georgia Mountain Regional Development Center for review.

Sincerely

Betty Cloer
Clerk of Commission

**RE: Short Term Work Program (STWP)
Solid Waste Management**

Dear Randy:

This letter is written in follow up to our discussions regarding preparation of the Joint City/County Solid Waste Management Plan 2003 Short Term Work Plan Update, which is due December 31, 2003.

Based upon our discussions, it appears that the documentation for this joint project has been verbally approved by Members of City Council on or about December 5, 2003 via discussions with me. Thus, based upon this verbal approval, please take the necessary steps to go forward with the completion of this joint endeavor.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Jimmy S. Moore
Mayor, City of Dawsonville

MEMORANDUM

*1/8/04 - good to go but
waiting for CAL*

TO: Interested Review Agencies, Commissions, Authorities and
Local Governments

FROM: Larry Sparks, Director of Planning

DATE: December 22, 2003

SUBJECT: Availability of Dawson County/City of Dawsonville Solid Waste Plan for
Review

In accordance with the standards established by the 1990 Georgia Comprehensive Solid Waste Management Act and the Georgia Department of Community Affairs for submission of "Solid Waste" plans, you are hereby notified of a scheduled public hearing/comment opportunity as indicated on the attached sheet. The purpose of this hearing is for public agencies to present their views on the Dawson County/City of Dawsonville Comprehensive Solid Waste Management Plan.

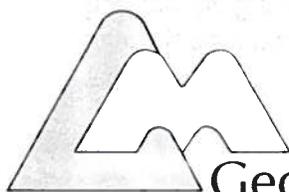

For each local government, two (2) copies of the notification form are attached. It is requested that one (1) of these copies be posted on the local government's official notice board. The other copy serves as the local government's official notice of local plan review.

Please be advised that the Comprehensive Solid Waste Management Plan is available for public review in the office of the Planning Director, Georgia Mountains RDC, 1310 W. Ridge Road, Gainesville, Georgia, phone 770-538-2626, as well as in the offices of the submitting local government indicated on the attached notice.

Written comments on the submitted Plan will be accepted by the Georgia Mountains Regional Development Center through the time of the public hearing.

Thank you for your attention to this matter.

Mr. Rick Brooks, Director
Planning and Environmental Management Division
Georgia Department of Community Affairs
60 Executive Park South, NE
Atlanta, GA 30329-2231

Dear Rick:

The Georgia Mountains RDC has been notified by Dawson County and the City of Dawsonville that they desire to update the Dawson County Solid Waste Management Plan by providing a Short Term Work Program Update and Report of Accomplishments. The GMRDC has completed its review and submits the following findings:

1. Two public hearings were held locally to solicit community input and comments on the Short Term Work Programs. (November 13, 2003 and December 3, 2003.)
2. The Dawson County Board of Commissioners and the Dawsonville City Council notified GMRDC requesting reviews of the STWP and the Report of Accomplishments.
3. A notice of public hearing/comment opportunity for regional review by GMRDC was mailed to interested local, state, and federal agencies on December 22, 2003. No written comments were received in response to this notice.
4. A regional hearing/comment opportunity was held by GMRDC on January 6, 2004 at 11:00 a.m. at the GMRDC office. No one other than staff attended and no comments were received.

Honorable Rick Brooks, Director
January 6, 2004
Page Two

5. The GMRDC has determined that Dawson County, and Dawsonville Short Term Work Programs are in compliance with Minimum Planning Standards and Procedures for Solid Waste Planning. There are no identified inter-jurisdictional conflicts and the plan is in compliance with regional goals and objectives.

Your review of this data is greatly appreciated. If you have any questions or need additional information, do not hesitate to call.

Sincerely,

Larry Sparks
Director of Planning

Dear Rick:

The Georgia Mountains RDC has been notified by Dawson County and Dawsonville that they have officially adopted the Dawson County Solid Waste Plan and STWP update, as approved by the Georgia Department of Community Affairs. I have enclosed a copy of the approval resolutions for your files.

It is my understanding that Dawson County and Dawsonville will now receive notification from your office of the continuation of their Qualified Local Government (QLG) status. Your attention to this matter is greatly appreciated.

If you have any questions or need additional information, do not hesitate to call.

Sincerely,
