

Disposal and Capacity 2006 Report

During Fiscal Year 2006 the amount of waste sent to Georgia Municipal Solid Waste (MSW) and Construction and Demolition (C&D) landfills increased, with imported waste offsetting reduced disposal by Georgians. In 2006, the remaining permitted MSW disposal capacity was approximately 25 years, down from 28 in 2005 and 16 years of remaining permitted C&D landfill space, down from 17 in 2005. Trends toward privatization of waste collection and disposal infrastructure continue statewide, with transfer stations increasingly popular as landfills become larger and demand larger volumes of waste to operate cost-effectively.

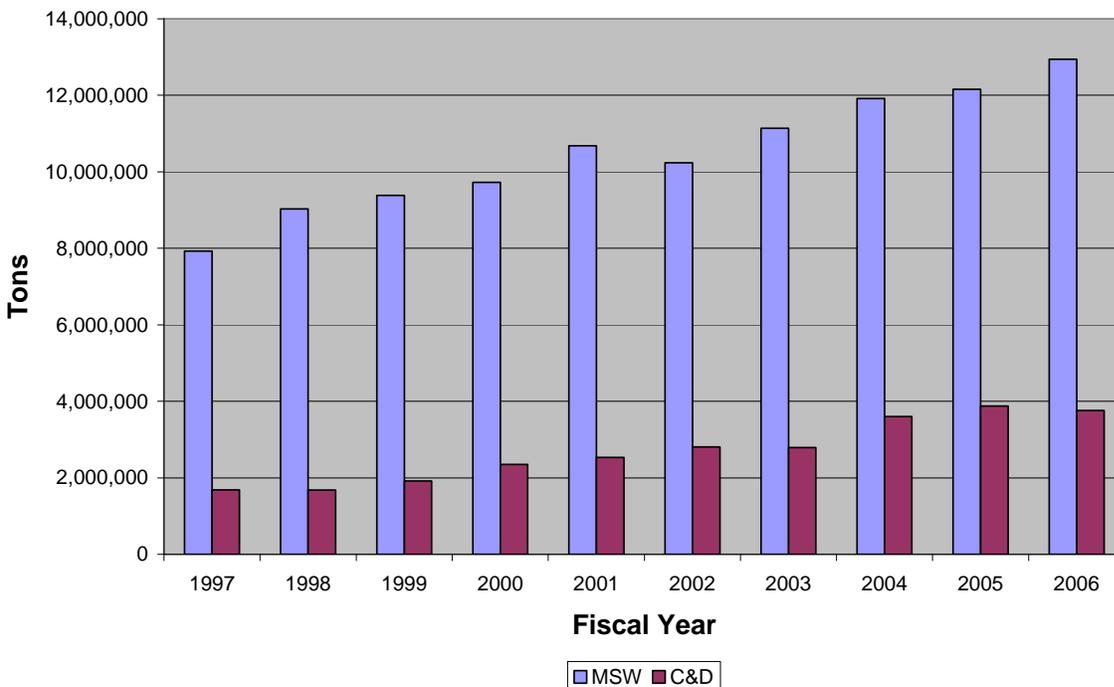

Where Does the Waste Go?

Much of the waste disposed of in Georgia enters lined, monitored MSW Landfills. Of the 16,928,567 tons of MSW and C&D waste disposed in permitted Georgia disposal facilities during FY 2006, 12,759,735 tons, or 75%, entered lined, monitored landfills meeting federal Subtitle D requirements. Approximately 3,758,010 tons, or 22% entered unlined Construction and Demolition landfills. The remainder was divided among unlined Municipal Solid Waste landfills (182,707 tons, or 1.1%), the state's only MSW incinerator (102,860 tons; 0.6%), and the state's only large-scale MSW composting facility (approximately 50,000 tons.)

Most of the waste disposed in Georgia enters private landfills. In FY 2006, landfill owners/operators reported 9,079,225 tons of waste entering 16 private MSW landfills, compared with 8,947,772 tons entering 15 private MSW landfills in FY 2005. In FY 2006, 3,476,732 tons of waste entered 49 publicly owned MSW facilities in the state, compared with 3,209,827 tons entering 53 public MSW landfills the previous year. From FY 1993-2006, the number of MSW landfills operated by cities, counties, and solid waste authorities dropped from 121 to 49.

Landfill Quick Facts FY 2006		
	Private	Public

Years	11.9	32.7
Cubic Yards	50 million	32 million

Tons of Waste Disposed FY 1997 - 2006

Disposal and Capacity 2006 Report

C&D Landfills

Construction and Demolition landfills are permitted disposal facilities that can only accept waste building materials and rubble resulting from construction, remodeling, repair, and demolition operations on pavements, houses, commercial buildings and other structures. Such wastes include, but are not limited to, yard trimmings, asbestos-containing waste, wood, bricks, metal, concrete, wall board, paper, cardboard, inert waste landfill material, and other nonputrescible wastes which have a low potential for groundwater contamination.

In FY 2006, landfill operators reported 3,525,015 tons of waste entering 18 private C&D facilities, while 752,452 tons of waste entered 34 publicly owned facilities.

1. Operating as of July 2006; some facilities cease operations or are added, so these figures may differ from those used elsewhere in this report.

2. Collection operations are any entity that collects waste from residential or commercial locations.

Unlined Landfills

During FY 2006, 182,707 tons of waste was disposed in five unlined MSW landfills. This represents approximately 1.1% of the total waste entering MSW landfills in Georgia. As of July 2006, five unlined MSW facilities were still operating under their original EPD-approved permits, and had not reached their closure capacity. Until they do, they must adhere to the same operating procedures and methane monitoring requirements as their more modern counterparts. When the unlined facilities close, they will be capped and monitored under federal Subtitle D regulations. There is no time limit

Unlined Landfills Accepting MSW FY 2006					
County	Facility Name	Total Tons Disposed	Avg. Daily Tons	Remaining Capacity (CY)	Remaining Capacity (Years)
Bibb	Macon-Walker Road Phase 2 (SL)	116,405	378	2,339,096	10

Total		182,707	540	4,208,520	
Average		36,541	108	1,052,130	19

*This facility ceased receiving waste in July 2006

for these landfills to meet Subtitle D regulations, but they will not be granted expansion permits. It is likely that a very small percentage of MSW generated in Georgia will continue to be disposed in unlined landfills for years to come.

Disposal and Capacity 2006 Report

Other Disposal Facilities

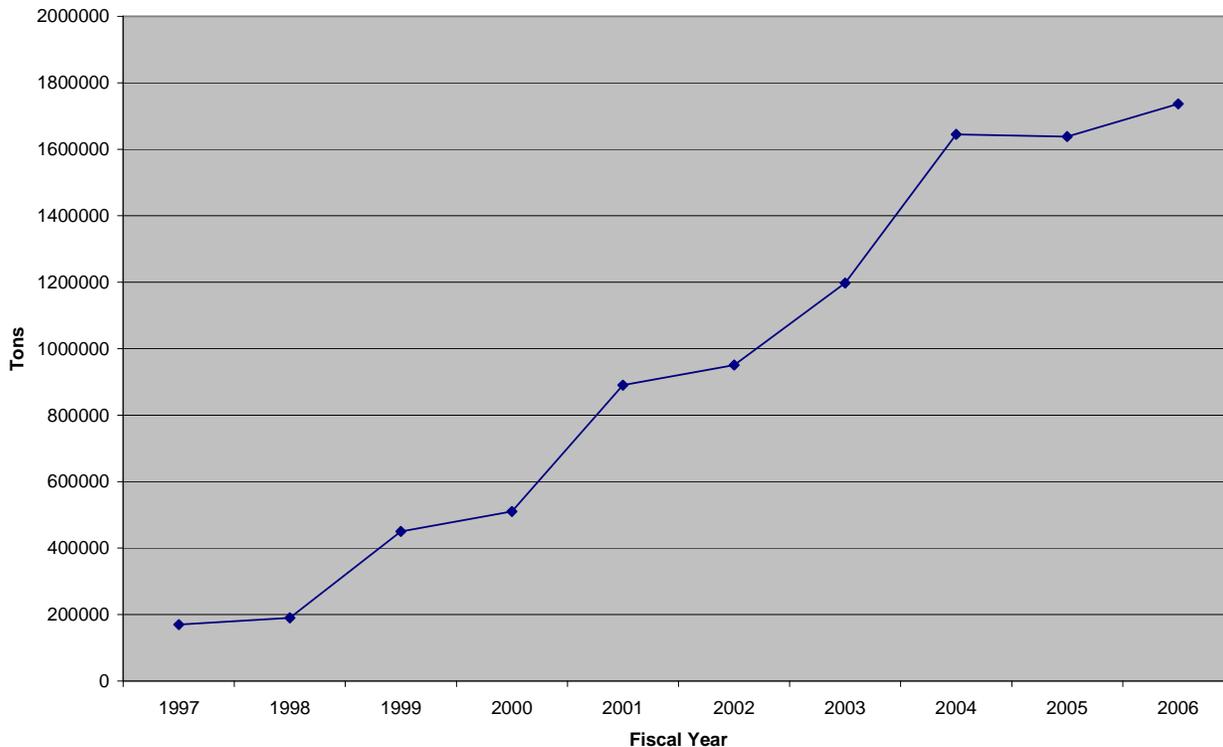

There is one MSW incinerator operating in Georgia accepting MSW. Located in Chatham County, the operation is also known as a waste-to-energy facility. The facility receives an average of 384 tons per day, mostly from the city of Savannah. During FY 2006, 102,860 tons of waste were incinerated at this facility. There are several other types of incinerators in public and private use that accept only specialized waste, such as wood waste.

Another unique waste disposal operation in Georgia is Cobb County's MSW composting facility. The facility accepts approximately 186 tons per day of MSW collected in Cobb County. The composting process results in a clean, beneficial soil amendment given to Cobb residents free of charge. During FY 2006, approximately 50,000 tons of MSW was processed at the Cobb Composting facility.

Imported Waste

The amount of waste brought to Georgia from other states and disposed is nearly 10 times greater than it was in FY 1998. Waste imports rose from 1,638,292 tons in FY 2005 to 1,736,865 in FY 2006. Most of the waste brought to Georgia from other states is MSW (91%); the remainder is C&D waste. Out-of-state waste amounts to 10.3% of the total amount of waste disposed in Georgia or 13.4% of the waste entering MSW landfills in the state. (See Imported Waste FY 1997-2006) It is difficult to track border waste exchange, and it is suspected that in most cases, it travels relatively short distances across state lines. Based on telephone interviews with transfer station operators that ship waste out of state, it is believed that approximately 150,000 tons per year of Georgia-generated waste is sent to neighboring states.

Imported Waste FY 1997 - 2006

Permitted capacity, or the amount of available space in landfills to dispose of tightly compacted waste, grew from 471 million cubic yards in FY 2005 to 516 million cubic yards in FY 2006. Georgia has an estimated 25.2 years of remaining permitted MSW landfill capacity statewide, based upon 2006 disposal rates. A breakdown by Regional Development

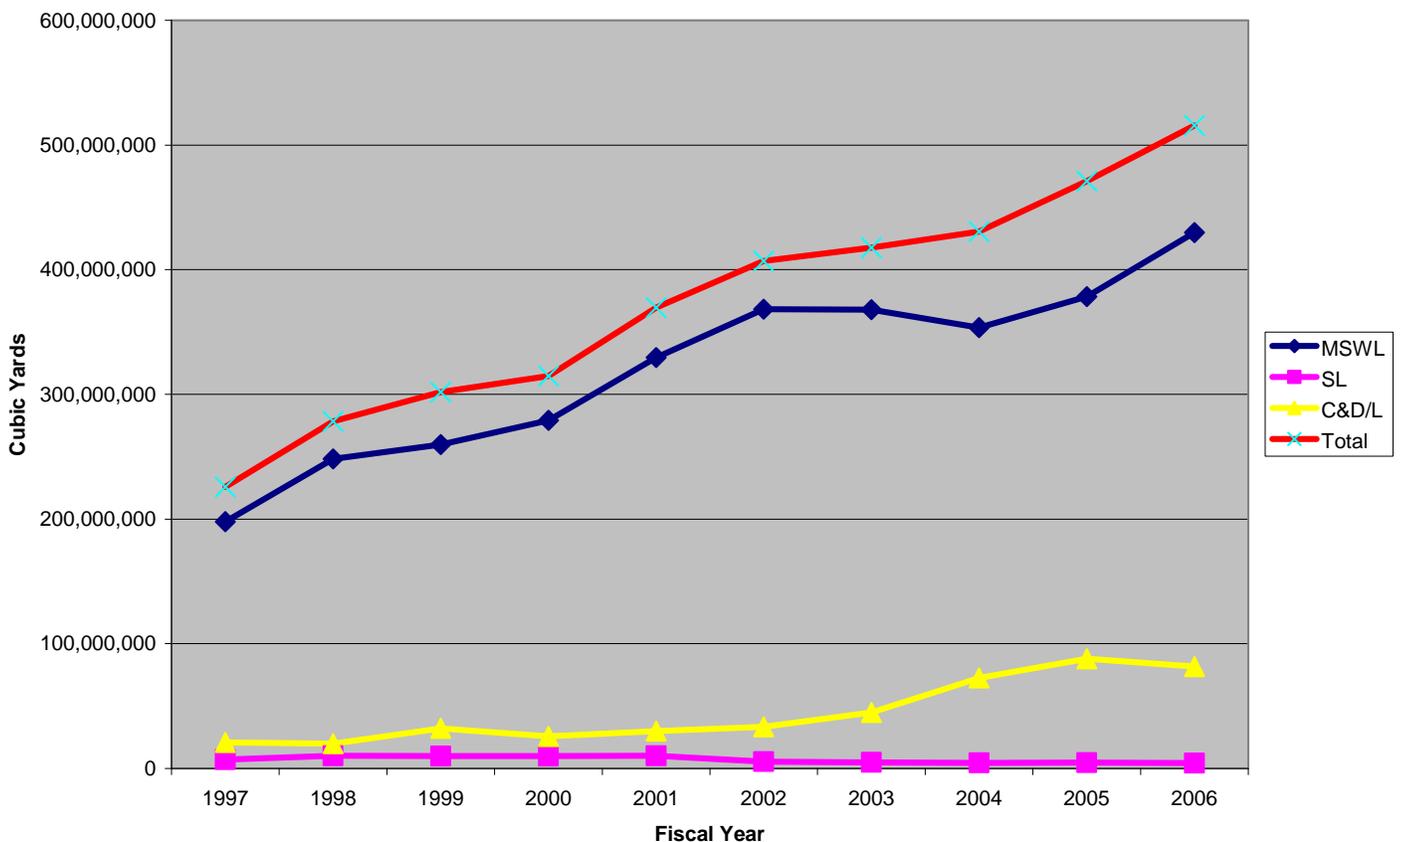

Disposal and Capacity 2006 Report

Center, can be found on page A-9. The projection of remaining capacity is based upon current disposal rates and disposal capacity permitted by the Georgia EPD, but not necessarily built landfill space.

The number of MSW landfills in Georgia has fallen since tighter federal regulations were adopted in the mid-1990s, but the number of C&D landfills has increased to 52 in FY 2006. In FY 1993, there were 187 public and private landfills in Georgia, and 75% of these were small facilities that only accepted waste generated within the host county. For FY 2006, approximately 53% of the state's total remaining capacity sits in just seven facilities, although there are 117 active permitted landfills in Georgia. These gains in remaining disposal capacity have occurred while smaller or older landfills are closed and enter lengthy post-closure monitoring periods. The public sector owns and operates a greater number of C&D facilities in the state, but it manages only 38% of the statewide C&D disposal capacity. The table entitled 'Georgia Landfills with Most Remaining Permitted Disposal Capacity FY 2006' on page A-6 ranks the top ten landfills in the state by remaining disposal capacity.

The map on page A – 5 illustrates regional capacity for MSW landfills, and highlights the importance of sound solid waste planning. A solid waste authority in the South Georgia RDC had received a permit for 13.5-million cubic yards of airspace for a new MSW landfill, but the facility was never constructed and the permit expired. That caused the region to lose approximately 20 years of disposal capacity, from 25 years to only five years of permitted disposal capacity.

Landfill Capacity by Type FY 1997 - 2006

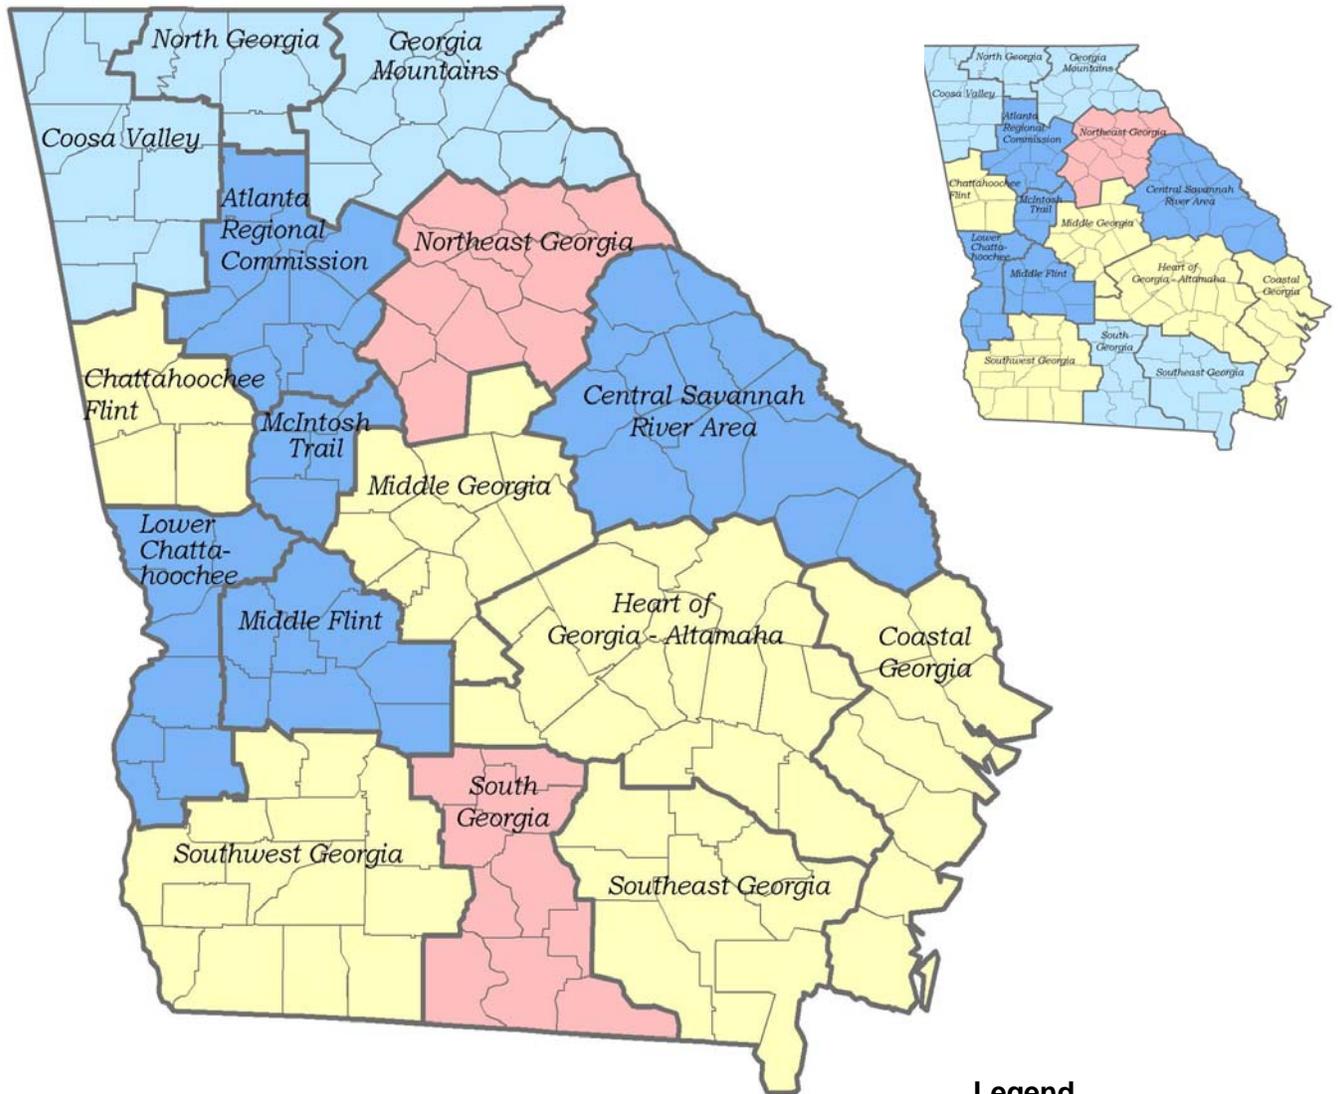

Remaining MSW Landfill Capacity

FY 2006

FY 2005

Map prepared by: Georgia Department of Community Affairs. Source: Years of remaining capacity by Regional Development Center was calculated using EPD-supplied average rate of fill and cubic yards of remaining capacity, based on 260 operating days per year.
