

Disposal and Capacity 2007 Report

During Fiscal Year 2007 the amount of waste sent to Georgia Municipal Solid Waste (MSW) and Construction and Demolition (C&D) landfills increased, with imported waste offsetting reduced disposal by Georgians. Newly permitted landfills slightly increased capacity to approximately 27.7 years of remaining permitted MSW landfill space and 19.3 years of remaining permitted C&D landfill space. Trends toward privatization of waste collection and disposal infrastructure continue statewide, with transfer stations increasingly popular as landfills become larger and demand larger volumes of waste to operate cost-effectively.

Where Does the Waste Go?

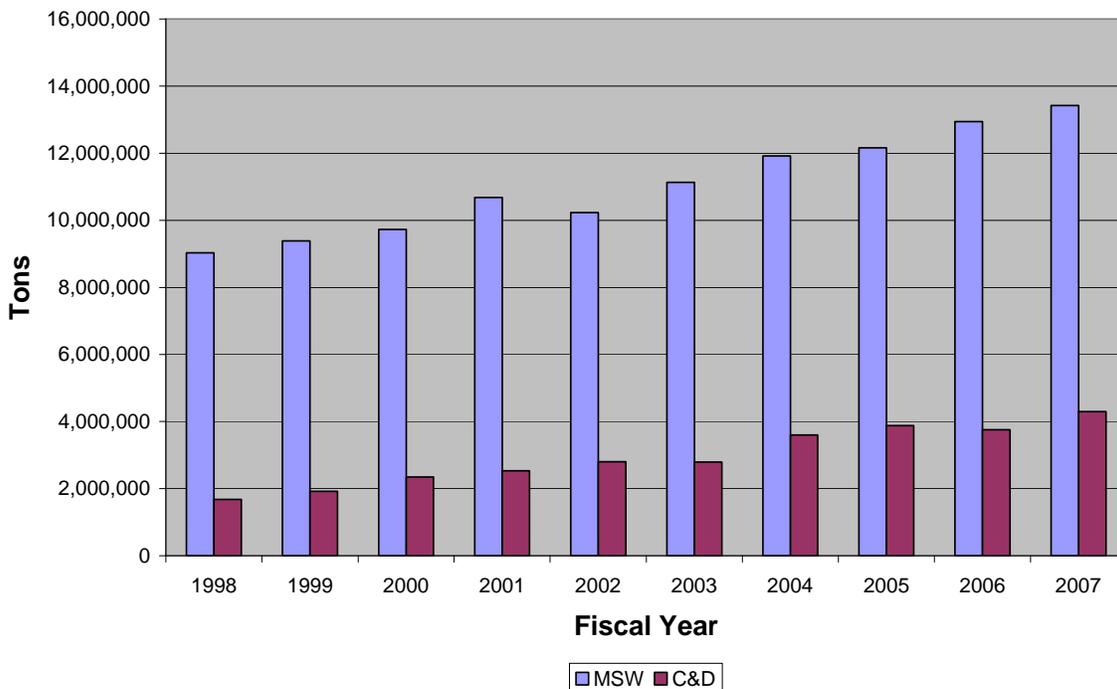

Much of the waste disposed of in Georgia enters lined, monitored MSW Landfills. Of the 17,719,189 tons of waste disposed in permitted Georgia disposal facilities during FY 2007, 13,162,532 tons, or 74.3%, entered lined, monitored landfills meeting federal Subtitle D requirements. Approximately 4,297,094 tons, or 24.25% entered unlined Construction and Demolition landfills. The remainder was divided among unlined Municipal Solid Waste landfills (159,731 tons, or 1.2%), the state's only MSW incinerator (96,832 tons; 0.6%), and the state's only large-scale MSW composting facility (approximately 100,000 tons.)

Most of the waste disposed in Georgia enters private landfills. In FY 2007, landfill owners/operators reported 9,134,630 tons of waste entering 16 private MSW landfills, compared with 9,079,225 tons entering 16 private MSW landfills in FY 2006. In FY 2007, 4,348,113 tons of waste entered 50 publicly owned MSW facilities in the state, compared with 3,476,732 tons entering 49 public MSW landfills the previous year.

From FY 1993-2007, the number of MSW landfills operated by cities, counties, and solid waste authorities dropped from 121 to 50.

Cubic Yards	57.8 million	32.6 million

Tons of Waste Disposed FY 1998 - 2007

Disposal and Capacity 2007 Report

C&D Landfills

Construction and Demolition landfills are permitted disposal facilities that can only accept waste building materials and rubble resulting from construction, remodeling, repair, and demolition operations on pavements, houses, commercial buildings and other structures. Such wastes include, but are not limited to, yard trimmings, asbestos-containing waste, wood, bricks, metal, concrete, wall board, paper, cardboard, inert waste landfill material, and other nonputrescible wastes which have a low potential for groundwater contamination.

In FY 2007, landfill operators reported 3,227,723 tons of waste entering 19 private C&D facilities, while 1,086,871 tons of waste entered 35 publicly owned facilities.

1. Operating as of July 2006; some facilities cease operations or are added, so these figures may differ from those used elsewhere in this report.

2. Collection operations are any entity that collects waste from residential or commercial locations.

*EPD counts MSW landfills accepting C&D waste in specially-designated cells as C&D landfills. For the purposes of this report, DCA counts them as MSW.

Unlined Landfills

During FY 2007, 159,731 tons of waste was disposed in five unlined MSW landfills. This represents approximately 1.2% of the total waste entering MSW landfills in Georgia. As of July 2007, five unlined MSW facilities were still operating under their original EPD-approved permits, and had not reached their closure capacity. Until they do, they must adhere to the same operating procedures and methane monitoring requirements as their more modern counterparts. When the unlined facilities close, they will be capped and monitored under federal Subtitle D regulations. There is no time limit

Unlined Landfills Accepting MSW FY 2007					
County	Facility Name	Total Tons Disposed	Avg. Daily Tons	Remaining Capacity (CY)	Remaining Capacity (Years)
Bibb	Macon-Walker Road Phase 2 (SL)	99,174	324	2,157,043	2

Average		31,946	145	987,700	16.8

*This facility ceased receiving waste in July 2006

Disposal and Capacity 2007 Report

for these landfills to meet Subtitle D regulations, but they will not be granted expansion permits. It is likely a small percentage of MSW generated in Georgia will continue to be disposed in unlined landfills for years to come.

Other Disposal Facilities

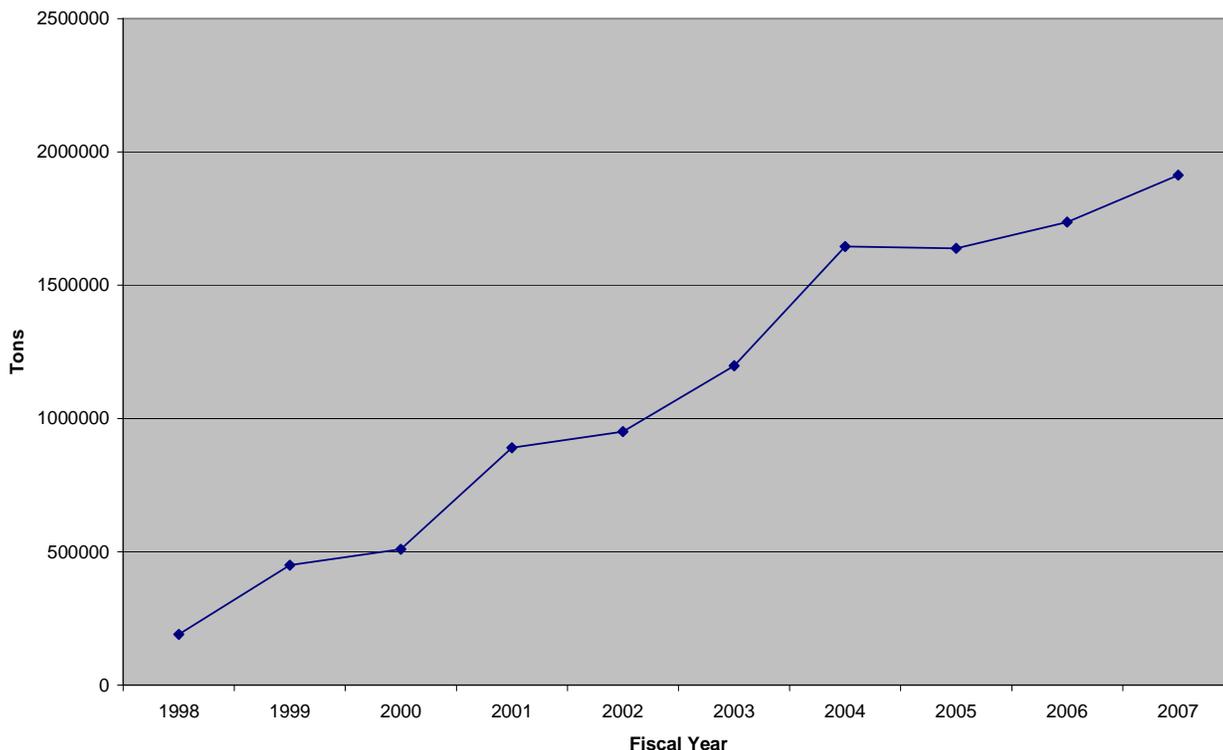

There is one MSW incinerator operating in Georgia accepting MSW. Located in Chatham County, the operation is also known as a waste-to-energy facility. The facility receives an average of 384 tons per day, mostly from the city of Savannah. During FY 2007, 96,832 tons of waste were incinerated at this facility. There are several other types of incinerators in public and private use that accept only specialized waste, such as wood waste.

Another unique waste disposal operation in Georgia is Cobb County's MSW composting facility. The facility accepts approximately 155 tons per day of MSW collected in Cobb County. The composting process results in a clean, beneficial soil amendment given to Cobb residents free of charge. During FY 2007, 40,201 tons of MSW was processed at the Cobb Composting facility.

Imported Waste

The amount of waste brought to Georgia from other states and disposed is more than eight times greater than it was in FY 1998. Waste imports rose from 1,736,865 in FY 2006 to 1,912,674 in FY 2007. Most of the waste brought to Georgia from other states is MSW (83%), with the remainder entering C&D landfills. Out-of-state waste amounts to 10.8% of the total amount of waste disposed in Georgia or 14.1% of the waste entering MSW landfills in the state. (See Imported Waste FY 1998-2007) It is difficult to track border waste exchange, and it is suspected that in most cases, it travels relatively short distances across state lines. Based on telephone interviews with transfer station operators that ship waste out of state, it is believed that approximately 150,000 tons per year of Georgia-generated waste is sent to neighboring states.

Imported Waste FY 1998 - 2007

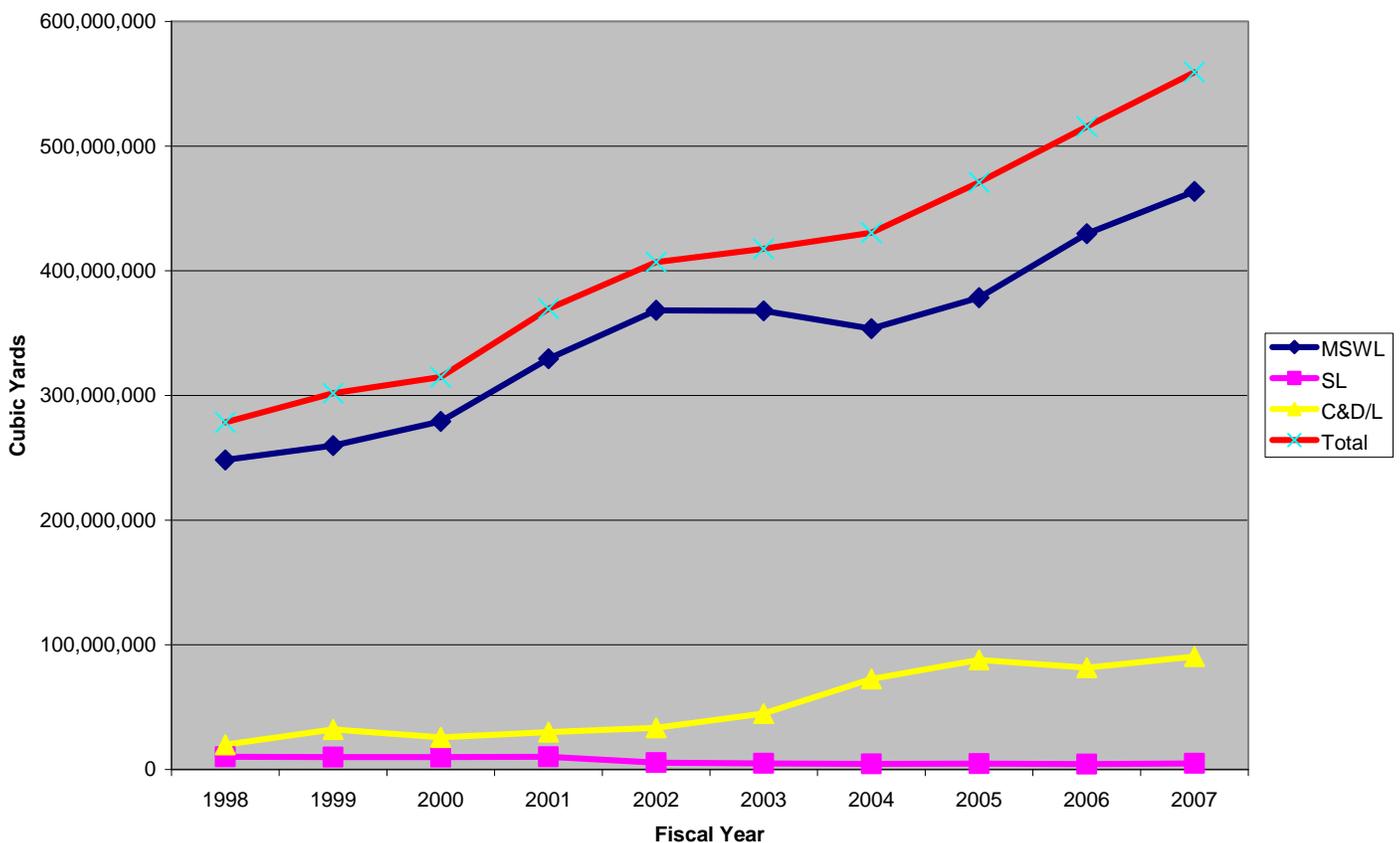

Disposal and Capacity 2007 Report

Capacity, or the amount of available space in landfills to dispose of tightly compacted waste, grew from 516 million cubic yards in FY 2006 to 559 million cubic yards in FY 2007. Georgia has an estimated 27.7 years of remaining permitted landfill capacity statewide, based upon 2007 disposal rates. A regional breakdown, by Regional Development Center, can be found on page A-9. The projection of remaining capacity is based upon current disposal rates and disposal capacity permitted by the Georgia EPD, but not necessarily constructed landfill space.

The number of MSW landfills in Georgia has fallen since tighter federal regulations were adopted in the mid-1990s, but the number of C&D landfills has increased to 54, up from 52 in FY 2006 in FY 2006. In FY 1993, there were 187 public and private landfills in Georgia, and 75% of these were small facilities that only accepted waste generated within the host county. For FY 2007, more than a third of the state's permitted disposal capacity sits in just four facilities, although there are 130 active permitted landfills in Georgia. These gains in remaining disposal capacity have occurred while smaller or older landfills are closed and enter lengthy post-closure monitoring periods. The table entitled 'Georgia Landfills with Most Remaining Permitted Disposal Capacity FY 2007' on page A-8 ranks the top ten landfills in the state by remaining disposal capacity.

Landfill Capacity by Type FY 1998 - 2007

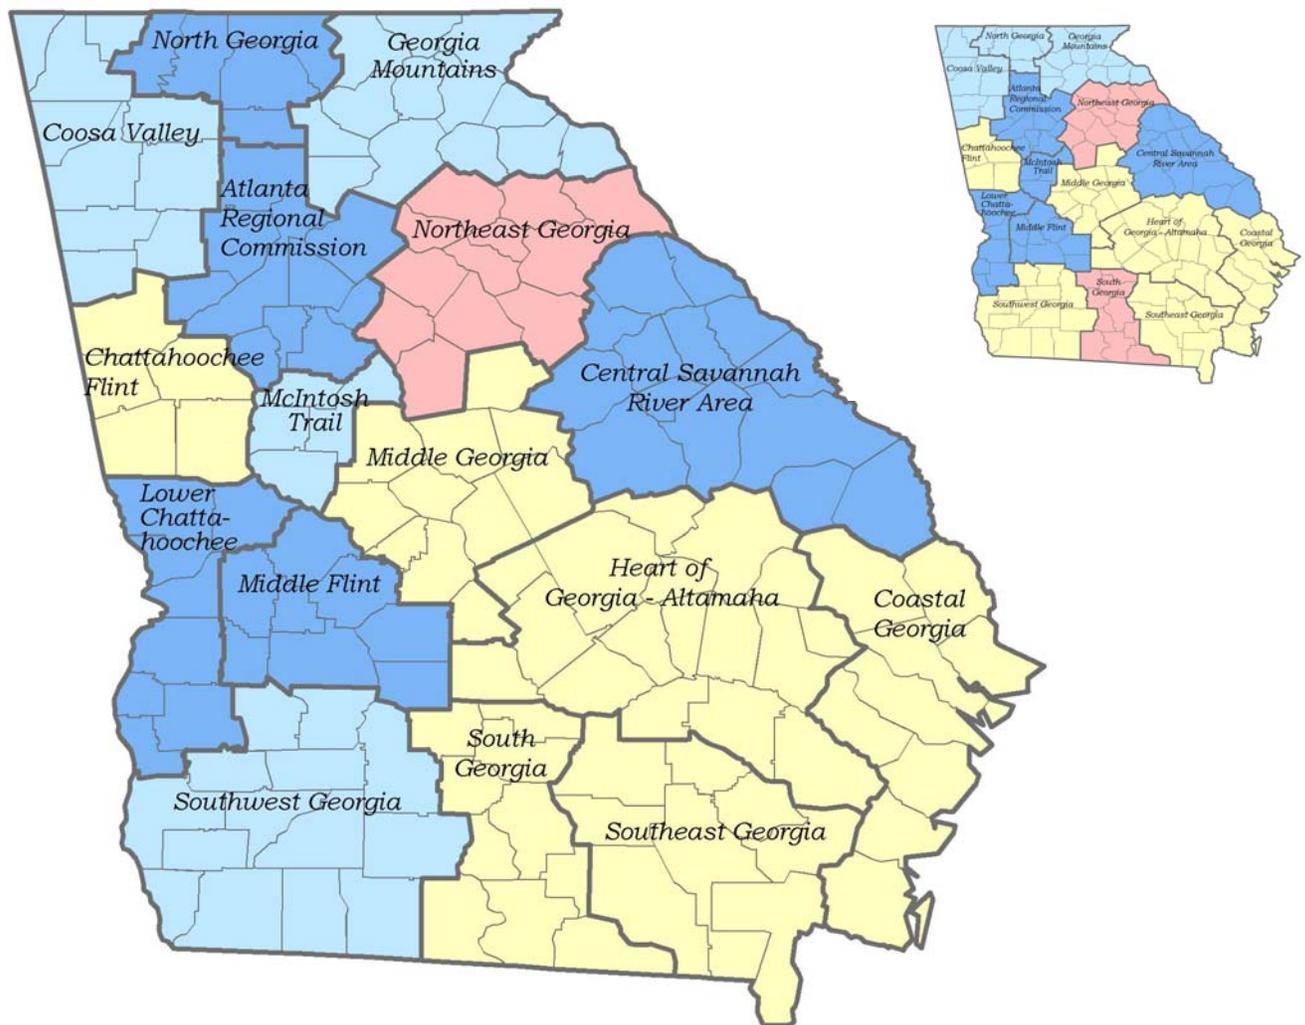

Remaining MSW Landfill Capacity
