

Disposal and Capacity 2008 Report

During Fiscal Year 2008 the amount of waste sent to Georgia Municipal Solid Waste (MSW) and Construction and Demolition (C&D) landfills decreased dramatically reversing more than a decade of rising disposal. (The possible reasons for this change are explored in the Executive Summary of this report.) Permitted capacity in 2008 is estimated to be approximately 26.6 years of remaining MSW landfill space and 25.1 years of remaining permitted C&D landfill space. However, some areas of the state, particularly Northeast Georgia, are quickly running out of disposal capacity.

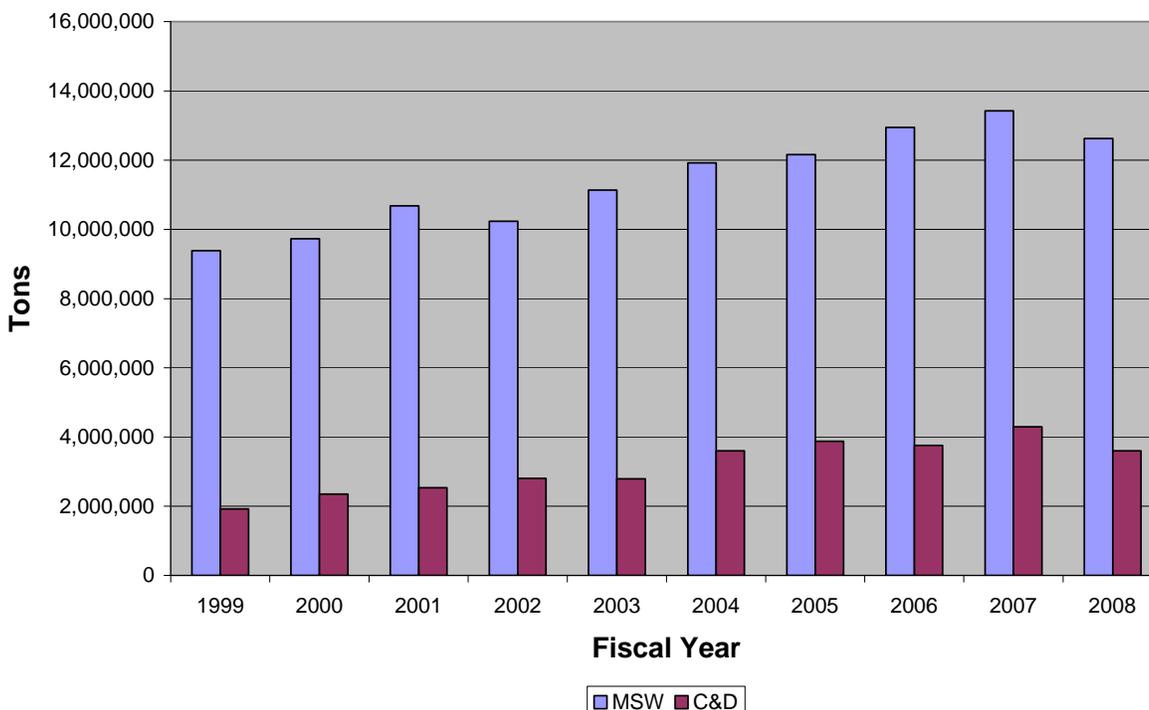

Where Does the Waste Go?

Much of the waste disposed of in Georgia enters lined, monitored MSW Landfills. Of the 16,267,962 tons of waste disposed in permitted Georgia disposal facilities during FY 2008, 12,406,504 tons, or 76%, entered lined, monitored landfills meeting federal Subtitle D requirements. Twenty-two percent of the waste (3,603,439 tons) entered unlined Construction and Demolition landfills. The remainder was divided among unlined Municipal Solid Waste landfills (175,319 or 1.0%) the state's only MSW incinerator (41,351 tons; 0.2%), and the state's only large-scale MSW composting facility (approximately 50,000 tons.)

Most of the waste disposed in Georgia enters private landfills. In FY 2008, landfill owners/operators reported 8,435,506 tons of waste entering 16 private MSW landfills, compared with 9,134,630 tons entering 16 private MSW landfills in FY 2007. In FY 2008, 4,187,667 tons of waste entered 47 publicly owned MSW landfills in the state, compared with 4,348,113 tons entering 50 public MSW landfills the previous year. From FY 1993-2008, the number of MSW landfills operated by cities, counties, and solid waste authorities dropped from 121 to 62; 17 of the MSW landfills also operate a separate cell within their MSW landfill for C&D materials only.

Cubic Yards	83 million	32 million

Tons of Waste Disposed FY 1999 - 2008

Disposal and Capacity 2008 Report

C&D Landfills

Construction and Demolition landfills are permitted disposal facilities that can only accept waste building materials and rubble resulting from construction, remodeling, repair, and demolition operations on pavements, houses, commercial buildings and other structures. Such wastes include, but are not limited to, yard trimmings, asbestos-containing waste, wood, bricks, metal, concrete, wall board, paper, cardboard, inert waste landfill material, and other nonputrescible wastes which have a low potential for groundwater contamination.

In FY 2008, landfill operators reported 2,884,282 tons of waste entering 22 private C&D facilities, while 719,157 tons of waste entered 32 publicly owned facilities.

1. Operating as of July 2006; some facilities cease operations or are added, so these figures may differ from those used elsewhere in this report.

2. Collection operations are any entity that collects waste from residential or commercial locations.

3. EPD updated its database of these facilities to verify those still in operation; many had ceased operations.

*EPD counts MSW landfills accepting C&D waste in specially-designated cells as C&D landfills. For the purposes of this report, DCA counts them as MSW.

Unlined Landfills

During FY 2008, 175,319 tons of waste was disposed in five unlined MSW landfills. This represents approximately 1.4% of the total waste entering MSW landfills in Georgia. As of July 2008, four unlined MSW facilities were still operating under their original EPD-approved permits, and had not reached their closure capacity. Until they do, they must adhere to the same operating procedures and methane monitoring requirements as their more modern counterparts. When the unlined facilities close, they will be capped and monitored under federal Subtitle D regulations. There is no time limit for these landfills to meet Subtitle D regulations, but they will not be granted expansion permits. It is likely a small percentage of MSW generated in Georgia will continue to be disposed in unlined landfills for years to come.

Unlined Landfills Accepting MSW FY 2008					
County	Facility Name	Total Tons Disposed	Avg. Daily Tons	Remaining Capacity (CY)	Remaining Capacity (Years)

Average		43,829	194	846,845	12.1

Disposal and Capacity 2008 Report

Other Disposal Facilities

There is one MSW incinerator operating in Georgia accepting MSW. Located in Chatham County, the operation is also known as a waste-to-energy facility. The facility receives an average of 159 tons per day, mostly from the city of Savannah. During FY 2008, 41,350 tons of waste was incinerated at this facility before it ceased operations. There are several other types of incinerators in public and private use that accept only specialized waste, such as wood waste.

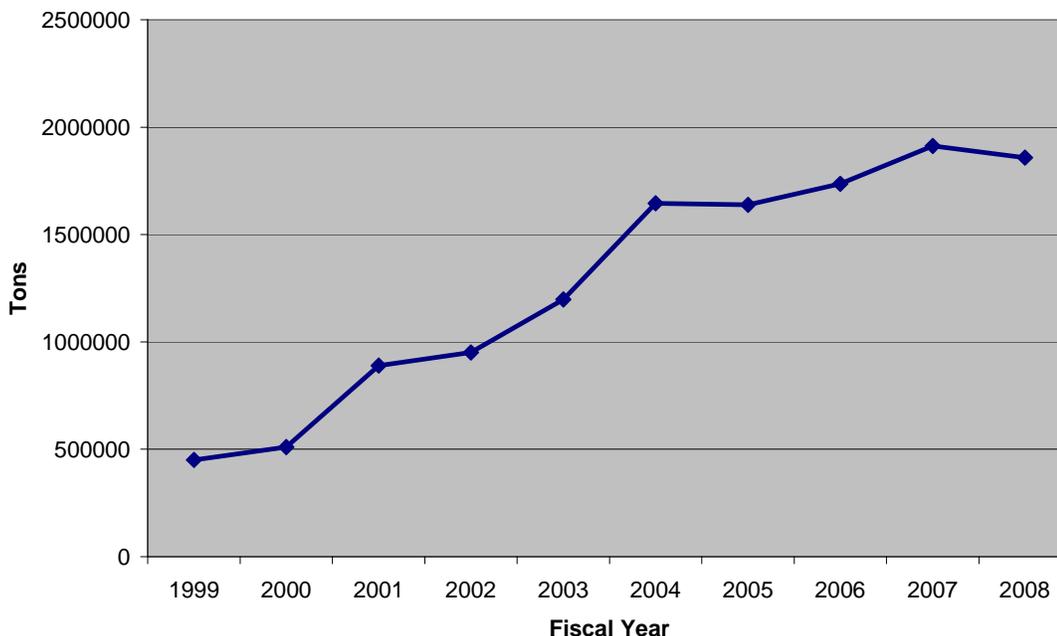

Another unique waste disposal operation in Georgia is Cobb County's MSW composting facility. The facility accepts approximately 155 tons per day of MSW collected in Cobb County. The composting process results in a clean, beneficial soil amendment given to Cobb residents free of charge. During FY 2008, approximately 40,000 tons of MSW was processed at the Cobb Composting facility.

Transfer stations are not actual disposal facilities, but they can offer significant collection savings and are becoming more common. There are nearly as many transfer stations as there are landfills, and the largest accept more than 1,000 tons of waste daily. Because these facilities are permit-by-rule, they do not have to pay the \$1 per-ton (minimum) host fee to local governments that MSW and C&D landfills must, per the Act, and they do not receive the same regulatory oversight from regulators that landfills do.

Imported Waste

The amount of waste brought to Georgia from other states and disposed is more than eight times greater than it was in FY 1998. Waste imports fell slightly from 1,912,674 tons in FY 2007 to 1,857,687 tons in FY 2008. Most of the waste brought to Georgia from other states is MSW (83%), with the remainder entering C&D landfills. Out-of-state waste amounts to 11.4% of the total amount of waste disposed in Georgia or 14.7% of the waste entering MSW landfills in the state. (See Imported Waste FY 1998-2008) It is difficult to track border waste exchange, and it is suspected that in most cases, it travels relatively short distances across state lines. Based on telephone interviews with transfer station operators that ship waste out of state, it is believed that approximately 150,000 tons per year of Georgia-generated waste is sent to neighboring states.

Imported Waste FY 1999 - 2008

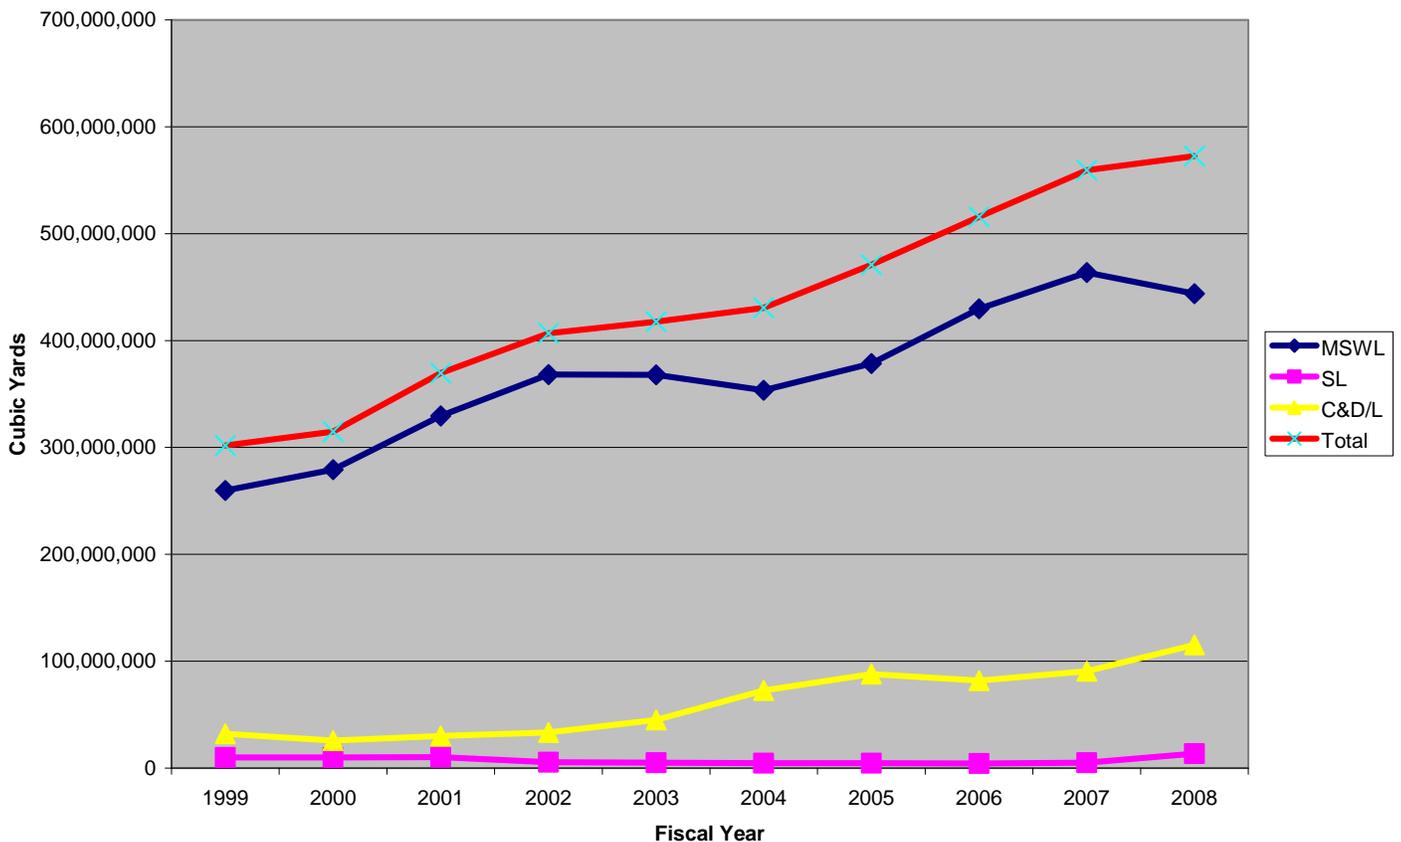

Disposal and Capacity 2008 Report

Capacity, or the amount of available space in landfills to dispose of tightly compacted waste, grew from 559 million cubic yards in FY 2007 to 572 million cubic yards in FY 2008. Georgia has an estimated 26.6 years of remaining permitted MSW capacity statewide, based upon 2008 disposal rates. A regional breakdown, by Regional Development Center, can be found on page A-9. The projection of remaining capacity is based upon current disposal rates and disposal capacity permitted by the Georgia EPD, but not necessarily constructed landfill space.

The number of MSW landfills in Georgia has fallen since tighter federal regulations were adopted in the mid-1990s, but the number of C&D landfills increased to 54. In FY 1993, there were 187 public and private landfills in Georgia, and 75% of these were small facilities that only accepted waste generated within the host county. For FY 2008, more than a third of the state's permitted disposal capacity sits in just four facilities, although there are 117 active permitted landfills in Georgia. These gains in remaining disposal capacity have occurred while smaller or older landfills are closed and enter lengthy post-closure monitoring periods. The table entitled 'Georgia Landfills with Most Remaining Permitted Disposal Capacity FY 2008' on page A-8 ranks the top five landfills in the state by remaining disposal capacity.

Landfill Capacity by Type FY 1999 - 2008

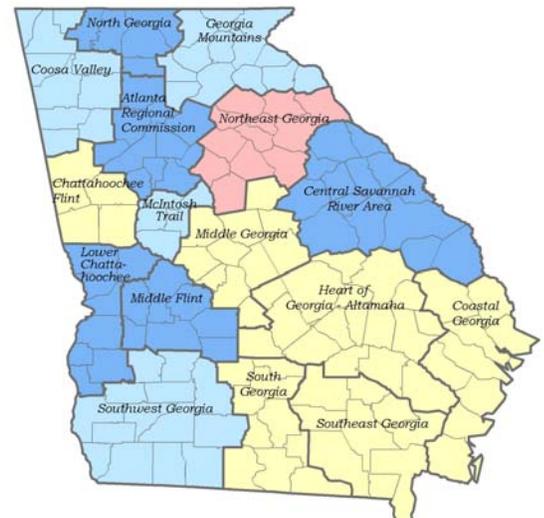

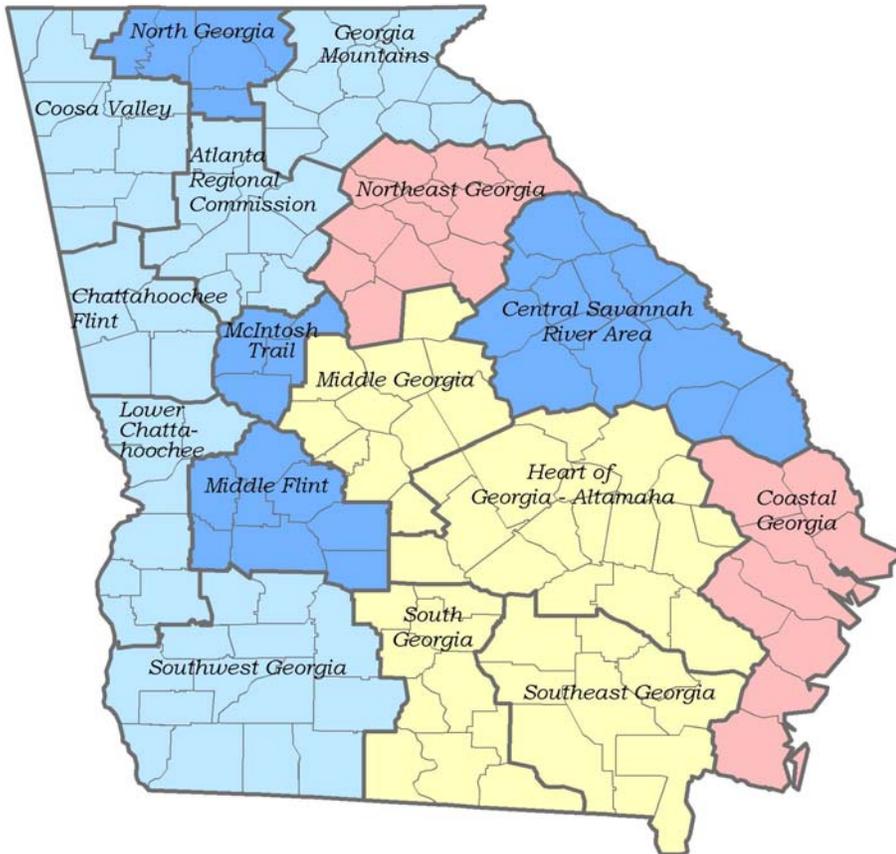

Remaining MSW Landfill Capacity

FY 2008

FY 2007
